Approval of Financial Report

King Country Trust

For the year ended 31 March 2026

The Trustees are pleased to present the approved financial report including the financial statements and the auditor's report of King Country Trust for year ended 31 March 2026.

The Trustees accept responsibility for:

- the preparation of the annual financial statements and the judgements used in these statements. The financial statements have been prepared in accordance with The Electricity Industry Act 2010 and the Financial Reporting Act 2013.
- establishing and maintaining a system of internal control designed to provide reasonable assurance as to the integrity and reliability of the Trust's financial reporting.

In the opinion of the Board, the annual financial statements for the financial year fairly reflect the financial position and operations of the Trust.

APPROVED

Total Cash and Cash Equivalents	853,040	1,007,459

These financial statements are to be read in conjunction with the accompanying Notes. These statements have been audited.

Statement of Accounting Policies

King Country Trust

For the year ended 31 March 2026

Reporting Entity

King Country Trust is an Energy Consumer Trust.

The Trust was established to hold shares in King Country Energy Limited. The principal activity of the Trust is to invest in accordance with the terms of the Trust Deed for the long term good of their beneficiaries.

The object of the Trust is to hold shares in King Country Energy Limited on behalf of the consumers, exercising the rights attached to ownership and distribute to consumers the benefits of ownership including any dividends received by the Trust, and to carry out future ownership reviews involving public consultation.

Statement of Compliance

The financial statements for the King Country Trust (KCT) have been prepared in accordance with Generally Accepted Accounting Practice in New Zealand (NZ GAAP). KCT is a Tier 2 for-profit entity and has elected to report in accordance with NZ IFRS (RDR) as issued by the New Zealand External Reporting Board (XRB).

KCT is eligible to report in accordance with NZ IFRS (RDR) on the basis that it does not have public accountability and is not large (as defined). The financial statements comply with New Zealand equivalents to International Financial Reporting Standards Reduced Disclosure Regime (NZ IFRS RDR), other New Zealand accounting standards and authoritative notices that are applicable to entities that apply NZ IFRS.

Basis of Preparation

The financial statements have been prepared in accordance with the requirements of the Financial Reporting Act 2013 and the Electricity Industry Act 2010.

The preparation of financial statements in conformity with NZ IFRS (RDR) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Trust's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant are disclosed at the end of the accounting policies.

The financial statements are presented in New Zealand dollars, and amounts have been rounded to the nearest \$ unless stated. They have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale assets and financial assets and liabilities at fair value through profit and loss.

Specific Accounting Policies

The following specific accounting policies which materially affect the measurement of the Statement of Profit or Loss and Other Comprehensive Income and Statement of Financial Position have been applied.

Revenue

Interest income on cash and cash equivalents and investments is recognised as it is earned (e.g. a term deposit that has been invested for 30 days of 100 at balance date will have 30 days of interest recognised). When a receivable is impaired, the Trust reduces the carrying amount to its estimated recoverable amount.

There is no revenue from contracts with customers.

Expenses

Expenses have been classified by their business nature.

Trade Receivables

Trade receivables are recognised at estimated realisable value.

Property, Plant and Equipment

Items of property, plant and equipment are measured on the cost basis and are therefore carried at cost less accumulated depreciation and any accumulated impairment losses. In the event the carrying amount of property, plant and equipment is greater than its estimated recoverable amount, the carrying amount is written down immediately to its estimated recoverable amount and impairment losses recognised either in profit or loss or as a revaluation decrease if the impairment losses relate to a revalued asset. A formal assessment of recoverable amount is made when impairment indicators are present.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably.

All other repairs and maintenance are recognised as expenses in the Statement of Profit or Loss and Other Comprehensive Income in the financial period in which they are incurred.

Depreciation

The depreciable amount of all fixed assets, including buildings and capitalised lease assets but excluding freehold land, is depreciated on a diminishing value basis. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

The following estimated depreciation rates/useful lives have been used:

Account	Method	Rate
Plant & Equipment	Diminishing Value (100%)	14.4% - 40%

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the year the asset is derecognised.

Income Tax

The income tax expense charged to the Statement of Profit or Loss and Other Comprehensive Income recognises the current year's provision adjusted for timing and permanent differences between taxable and accounting income. Deferred tax is calculated using the comprehensive basis under the liability method and future tax benefits are not recognised unless realisation of the asset is virtually certain.

Investments

Short term deposits have maturities between three months and one year, and longer term deposits that mature within one year of balance date. These are disclosed at their fair value (cost).

At balance date the Trust assesses whether there is any objective evidence that an investment is impaired. Any impairment loss is recorded as an expense in the income statement.

Financial Instruments

Financial instruments are recognised in the Balance Sheet when the company becomes party to a financial contract. They include cash balances, deposits, bank overdraft, payables, receivables and intercompany balances.

All of the financial instruments of the company are initially recorded at cost and subsequently carried at amortised cost using the effective interest method. Due allowance is made for impaired receivables (credit losses).

Financial Instruments (Assets and Liabilities)

Recognitions and Derecognition

Financial assets and financial liabilities are recognised when the trust becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, waived, cancelled or expires.

Classification and Initial Measurement of Financial Assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with Revenue from Contracts with Customers (NZ IFRS 15), all financial assets are initially measured at fair value adjusted for transaction costs (where applicable).

Financial assets, other than those designated and effective as hedging instruments, are classified into the following categories:

- amortised cost
- fair value through profit or loss (FVTPL)
- fair value through other comprehensive income (FVOCI).

The classification is determined by both:

- the entity's business model for managing the financial asset
- the contractual cash flow characteristics of the financial asset.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which is presented within other expenses.

Subsequent Measurement of Financial Assets

Financial Assets at Amortised Cost

A financial asset is measured at amortised cost if the asset meets both of the following conditions (and are not designated as FVTPL):

- the financial asset is held within a business model whose objective is to hold the financial assets to collect contractual cash flows
- the contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

This category includes non-derivative financial assets like loans and receivables with fixed or determinable payments that are not quoted in an active market. After initial recognition, these are measured at amortised cost using the effective interest method. Discounting is omitted where the effect of discounting is immaterial. The trust cash and cash equivalents, trade and most other receivables fall into this category of financial instruments.

Financial Assets at Fair Value through Profit or Loss (FVTPL)

Financial assets that are held within a different business model than 'hold to collect' or 'hold to collect and sell', and financial assets whose contractual cash flows are not solely payments of principal and interest are accounted for at FVTPL. All derivative financial instruments fall into this category, except for those designated and effective as hedging instruments, for which the hedge accounting requirements apply (see below).

Assets in this category are measured at fair value with gains or losses recognised in profit or loss. The fair values of financial assets in this category are determined by reference to active market transactions or using a valuation technique where no active market exists.

Financial Assets at Fair Value through other Comprehensive Income (FVOCI)

The Trust accounts for a financial asset at FVOCI if the asset meets both the following conditions:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets
- the contractual term of the financial asset gives rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Any gains or losses recognised in OCI will be recycled upon derecognition of the asset.

Impairment of Financial Assets

Impairment applies to financial assets measured at amortised cost, contract assets and debt-type financial assets at FVOCI, but not to investments in equity instruments.

Recognition of credit losses is no longer dependent on the trust first identifying a credit loss event. Instead the trust considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ('Stage 1') and
- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ('Stage 2').

'Stage 3' would cover financial assets that have objective evidence of impairment at the reporting date. However, none of the trust's financial assets fall into this category.

'12-month expected credit losses' are recognised for the first category while 'lifetime expected credit losses' are recognised for the second category.

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Trade and Other Receivables and Contract Assets

The trust makes use of a simplified approach in accounting for trade and other receivables as well as contract assets and records the loss allowance as lifetime expected credit losses. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial instrument. In calculating, the trust uses its historical experience, external indicators and forward-looking information to calculate the expected credit losses using a provision matrix.

The trust recognises 12-month expected credit losses for financial assets at FVOCI. As most of these instruments have an outstanding credit rating, the likelihood of default is deemed to be small. However, at each reporting date there is an assessment whether there has been a significant increase in the credit risk of the instrument.

In assessing these risks, reliance is on readily available information such as the credit ratings issued by the major credit rating agencies for the respective asset. The trust only holds simple financial instruments for which specific credit ratings are usually available. In the unlikely event that there is no or only little information on factors influencing the ratings of the asset available, the trust would aggregate similar instruments into a portfolio to assess on this basis whether there has been a significant increase in credit risk.

In addition, other indicators are considered such as adverse changes in business, economic or financial conditions that could affect the borrower's ability to meet its debt obligation or unexpected changes in the borrower's operating results.

Should any of these indicators imply a significant increase in the instrument's credit risk, lifetime ECL is recognised for this instrument or class of instruments.

Classification of Financial Liabilities

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the trust designated a financial liability at fair value through profit or loss.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities at FVTPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments).

All interest-related charges and, if applicable, changes in an instrument's fair value that are reported in profit or loss, are included within finance costs or finance income.

Goods and Services Tax

The entity is not registered for GST and all amounts are stated inclusive of GST.

Investment in Associates

Associates are entities the trust is able to exert significant influence over but which are not subsidiaries. A joint venture is an arrangement that the trust controls jointly with one or more other investors, and over which the trust has rights to a share of the

arrangement's net assets rather than direct rights to underlying assets and obligations for underlying liabilities. Investments in associates and joint ventures are accounted for using the equity method.

Any goodwill or fair value adjustment attributable to the share in the associate or joint venture is not recognised separately and is included in the amount recognised as an investment. The carrying amount of the investment in associates and joint ventures is increased or decreased to recognise the share of the profit or loss and other comprehensive income of the associate and joint venture, adjusted where necessary to ensure consistency with the accounting policies of the trust.

Unrealised gains and losses on transactions with the associates and joint ventures are eliminated to the extent of the entity's interest in those entities. Where unrealised losses are eliminated, the underlying asset is also tested for impairment.

Impairment

The carrying amounts of the Trust's assets other than inventories are reviewed at each balance date to determine whether there is any indication of impairment. If any such indication exists, the assets recoverable amount is estimated.

An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of assets and are recognised in the Statement of Comprehensive Income.

New NZ IFRS standards and interpretations issued but not yet effective

A number of new standards and interpretations have been issued but are not yet applicable for the current year-end. The reported results and financial position of the trust is not expected to change on adoption of these pronouncements as they do not result in any changes to the entity's existing accounting policies.

Significant Judgements, Estimates and Assumptions

The preparation of financial statements in conformity with NZ IFRS requires the use of certain critical accounting estimates. It also requires Trustees to exercise their judgement in the process of applying the Trust's accounting policies. In making these judgements, estimates and assumptions concerning the future are made. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Significant Judgements in Applying Accounting Policies

The following are significant judgements in applying accounting policies that have the most significant effect on the financial statements.

Impairment of Assets

NZ IFRS requires that assets are carried at no more than their recoverable amount. This requires Trustees to make judgements regarding amounts recoverable and provisions for impairment. Trustees must apply judgement in assessing likely outcomes.

Income Taxes and Deferred Taxation

Judgement is required in determining the provision for income taxes and the ultimate determination is uncertain until assessments are finalised.

Associates

Assessment has been made of whether or not significant influence exists in King Country Energy Limited.

Changes in Accounting Policies

There have been no changes in accounting policies. Policies have been applied on a consistent basis with those of the previous reporting period.

Notes to the Financial Statements

King Country Trust For the year ended 31 March 2026

	2026	2025
1. Revenue		
Finance income - investment earnings		
Interest Received	7,960	36,242
Change in Value of Fair Value Investments	814,072	335,351

Insurance	5,716	11,491
Legal Expenses	112,310	13,582
Meeting Expenses	1,850	958
Postages	13	21
Secretarial Expenses	31,393	34,892
Stationery & Photocopying	228	-
Telephones & Tolls	-	90
Travelling Expenses	3,017	3,940
Trustee Fees	98,892	97,317
Website Costs	820	696
Total Trust administration expenses	309,741	203,665
	2026	2025

3. Beneficiary and Community Project Expenses

Donations	21,000	249,041
Total Beneficiary and Community Project Expenses	21,000	249,041

	2026	2025
4. Investment Costs		
Consultancy Fees	42,667	86,423
Total Investment Costs	42,667	86,423
	2026	2025

5. Strategic and Consultancy Expenses

Ownership Review Costs	150,362	-
Trust Deed Review Costs	-	12,083
Total Strategic and Consultancy Expenses	150,362	12,083
	2026	2025

6. Depreciation and losses on disposal of assets

Depreciation	1	2
Total Depreciation and losses on disposal of assets	1	2
	2026	2025

7. Share of total comprehensive income from investment in associate recognised in net surplus

Share of post-tax profit (loss) of equity accounted associates	5,080,932	1,059,652
Share of other comprehensive income from investment in associate accounted for using the equity method	-	1,486,060
Total Share of total comprehensive income from investment in associate recognised in net surplus	5,080,932	2,545,712

The treatment of the King Country Energy Ltd investment in associate was changed on 27 March 2026 when the decision to sell shares was made by the Trust. The investment was subject to equity accounting until that date. All amounts recognised through other comprehensive income were transferred to retained earnings at the time (see the Statement of Movements in Equity).

	2026	2025
8. Income Tax Expense		
Net Profit (Loss) before Tax	25,369,893	2,016,222
Permanent Differences		
Income		
Income from associate subject to income tax	371,552	344,172
Add back share of surplus in associate	(5,080,932)	(1,059,652)
Change in Value of Fair Value Investments	(814,072)	(335,351)
Revaluation of Investments Available for Sale	(19,297,416)	-
PIE Income	(693,286)	(1,136,190)
Share of partnership profit/loss	(9,865)	-
Total Income	(25,524,018)	(2,187,021)
Expenditure		
Ownership Review Costs	150,362	-

	2026	2025
Trust Deed Review Costs	-	12,083
Total Expenditure	150,362	12,083
Total Permanent Differences	(25,373,656)	(2,174,938)
Timing Differences		
Accrued Interest	-	5,470
Total Timing Differences	-	5,470
Current Year Taxable Profit (Loss)	(3,763)	(153,246)
Tax Expense (Benefit) at 33%	(1,242)	(50,571)

The Trust is required to account for income tax on a deferred tax basis. As the treatment of assets and liabilities is materially consistent with income tax there are no material timing differences that result in deferred tax balances. Tax expense, as shown above, excludes tax on the share of the associates profit (and is reflected without the dividend included in the tax return). Where imputation credits are not able to be refunded this is reflected as a current asset (future income tax benefit). A PIE rate of 0% is to be applied going forward to selected investments to enable the future utilisation of this tax benefit.

	2026	2025
9. Auditors Remuneration		
Audit Fees	8,318	7,922
Total Auditors Remuneration	8,318	7,922

The auditor of King Country Trust is Spooner, Toy & Hood Limited.

	2026	2025
10. Cash and Cash Equivalents		
Bank of New Zealand - Achiever Savings	780,942	993,424
Bank of New Zealand - Current Account	72,097	14,035
Total Cash and Cash Equivalents	853,040	1,007,459

The cash and cash equivalents shown above is consistent with that used for the purposes of the statement of cash flows.

Investment in Associate (equity-accounted)

King Country Energy Limited	-	24,387,268
Total Investment in Associate (equity-accounted)	-	24,387,268

Total Investments	75,966,653	52,072,475
--------------------------	-------------------	-------------------

Investments (excluding the investment in associate) are recognised at fair value through profit or loss. It is revalued at balance date to fair value with gains or losses (changes in value) recognised in net surplus.

King Country Energy Limited, an associate (incorporated and operating in New Zealand), is reflected in the financial statements using the equity method. The proportion of ownership during the year was 24.98%. On 27 March 2026, following public consultation, King Country Trust agreed to sell (in a conditional agreement) their investment in King Country Energy Limited to Contact Energy Limited for \$47,000,000 receiving Contact Energy shares in exchange. The agreement subsequently went unconditional and was fully executed on 17 April 2026. The investment was reclassified from an Investment in Associate (equity accounted) to an asset held for sale (current asset) as at the date the Trustees agreed to sell the shares (27 March 2026) and the increase in fair value recognised in profit and loss.

Movements in the fair value of financial assets held for sale were recognised through the Statement of Profit or Loss.

(Prior year: An investment of \$2.5m has been made in Salt Investments utilising funds withdrawn from the Fisher Funds Investment.)

INDEPENDENT AUDITOR'S REPORT

To the Trustees and Consumer Beneficiaries of the King Country Trust.

Opinion

We have audited the financial statements of King Country Trust on pages 5 to 18, which comprise the balance sheet as at 31 March 2026, and the statement of profit or loss and other comprehensive income, statement of changes in equity and cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements of the Trust are prepared, in all material respects, in accordance with New Zealand equivalents to International Financial Reporting standards – Reduced Disclosure Regime (NZIFRS RDR).

Basis of Opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) (ISAs (NZ)). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of King Country Trust in accordance with Professional and Ethical Standard 1 (Revised) *Code of Ethics for Assurance Practitioners* issued by the New Zealand Auditing and Assurance Standards Board, and we have fulfilled our other responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other than in our capacity as auditor we have no relationship with, or interests in, King Country Trust.

Restriction on Responsibility

This report is made solely to the Trustees and Consumer beneficiaries of the Trust. Our audit work has been undertaken so that we might state to the Trustees and Consumer beneficiaries those matters which we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Trust, the Trustees and the Consumer beneficiaries for our audit work, for this report or for the opinions we have formed.

Trustees' Responsibility for the Financial Statements

The Trustees are responsible on behalf of the entity for the preparation and fair presentation of the financial statements in accordance with NZIFRS RDR, and for such internal control as the Trustees determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Trustees are responsible on behalf of the entity for the entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Trustees either intend to liquidate the entity or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (NZ) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decisions of users taken on the basis of these financial statements.

A further description of the auditor's responsibilities for the audit of the financial statements is located at the XRB's website at

<https://www.xrb.govt.nz/assurance-standards/auditors-responsibilities/audit-report-8/>
